2 Introduction

## Introduction

## What is EduSupport?¶

EduSupport is a GeyserMC plugin that provides protocol support for Minecraft Educational Edition. This allows Minecraft Educational users to be able to log into a Java server.

3 Contributing¶

## **Contributing**¶

Here are some ways that you can help contribute to this project.

## New ideas or Bug Reports¶

Need something? Found a bug? Or just have a brilliant idea? Head to the Issues (https://github.com/Bundabrg/EduSupport/issues) and create new one.

## Contributing Code¶

If you know Java then take a look at open issues and create a pull request.

Do the following to build the code:

```
git clone https://github.com/Bundabrg/EduSupport
cd EduSupport
mvn clean package
```

## Contributing Documentation¶

If you can help improve the documentation it would be highly appreciated. Have a look under the docs folder for the existing documentation.

The documentation is built using mkdocs. You can set up a hot-build dev environment that will auto-refresh changes as they are made.

#### Requirements¶

- python3
- pip3
- npm (only if changing themes)

Install dependencies by running:

```
pip3 install -r requirements.txt
```

#### Dev Environment¶

To start a http document server on http://127.0.0.1:8000 execute:

mkdocs serve

#### Change PDF Theme¶

Edit the PDF theme under docs/theme/pdf. Rebuild by doing the following:

cd docs/theme/pdf
npm install
npm run build-compressed

This will update pdf.css under docs/css/pdf.css. Rebuilding the docs will now use the new theme.
